

PENDANT MIRROR 02

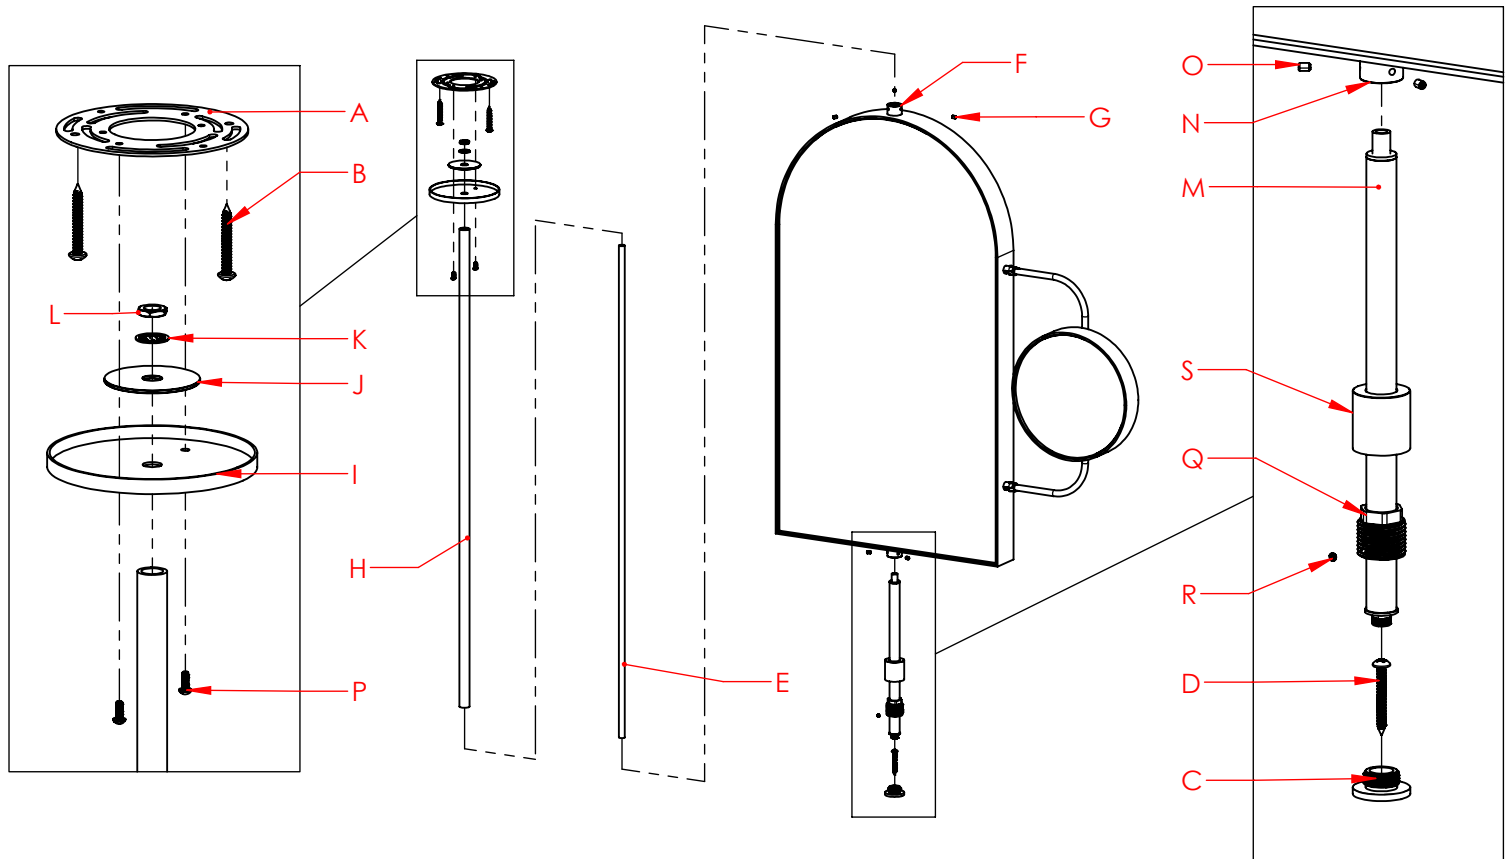

SAFETY INFORMATION

INSTALLATION OF THIS MIRROR REQUIRES 2 PEOPLE.

PENDANT MIRROR 02

1. Install ceiling bracket (A) at desired location using appropriate mounting hardware (B, NOT INCLUDED). Make sure there are holes drilled behind the bracket to accommodate the finished screws (P) used later.
2. Install surface mount coupling (C) using appropriate mounting hardware (D, NOT INCLUDED). Use a plumb or laser to ensure it is directly below the center of the ceiling bracket.
3. Thread rod (E) into coupling at top of fixture body (F), then secure with set screws (G).
4. Slide cover tube (H) down threaded rod, followed by the canopy, flat washer, and lock washer (I, J, K), then lock in place with nut (L).
5. If bottom stem (M) is not already attached to mirror body, thread it into coupling (N), then secure with set screws (O).
6. Lift mirror assembly up to ceiling and secure with finished screws (P).
7. Slide internal foot coupling (Q) down bottom stem, and thread onto mount coupling (C) until mirror assembly is pulled into tension. Then, secure with set screw (R).
8. Thread foot cover (S) onto coupling (Q) until the bottom surface is flush with (C).
