

LAVA LIGHT

An exploration between natural forms and the precision of the man-made, this light is a visual interpretation of that tension which exists in our everyday. Each volcanic lava boulder and steel curve is 3d scanned in order to perfectly carve out a path in which they can intersect, furthering the play between the natural and technological intervention. The curved exterior is finished in a rich warm black while the interior is finished in a light antique brass.

Materials

Lava Rock
Steel
Acrylic
Brass

Standard Finishes
